INDEX.

Air prior to the Discovery of Oxygen,—On the Supposed Nature of..... 193
Alcohol from the Jerusalem Artichoke..... 374
Almshouse,—Experiments on the Warming and Ventilating of the Philadelphia 60
————,—Report of the Committee on the Warming and Ventilating of the Philadelphia..... 14
Amalgam when used for the Extraction of Silver,—Notice of Sodium..... 231
Ammonium,—New Process for the Manufacture of Sulphide of..... 86
Analysis,—Notice of Will's Tables for Qualitative..... 424
Armor Plates,—Notice of Steel Faced..... 224
Armored Frigate *New Ironsides*,—Description of the U. S. Steam..... 73
Arsenuretted Hydrogen,—Process for Distinguishing..... 372
Artificial Tannin,—W. Skey's Process for Preparing..... 86
Anthracite Coal as a Fuel,—Statistics of the Increase in the Use of..... 314

Ball and Socket Journal Bearings,—C. Sellers on the..... 198
Ballantyne, (A. G.) Paper on Ground Batteries..... 329
Bessemer's Process for making Iron and Steel,—Notice of..... 232
Bibliographical Notices.
Photographic Mosaics. By M. C. Lea and E. L. Wilson..... 70
Notes on Polytechnic Schools in the United States. By S. E. Warren 210
General Problems of Shades and Shadows. By S. E. Warren..... 359
The Art of Perfumery. By G. W. Septimus Piesse..... 423
Mill's Tables for Qualitative Analysis. Translated by Professor C. F. Himes..... 424
Art of Manufacturing Soap and Candles. By Adolph Ott..... 425
Black Band Ore,—Notice of a new Deposit of..... 367
Blackwall Rock and its Lessons..... 336
Blast Furnaces,—Notice of the English Practice in Construction of..... 68
Blasting,—Notice of Nitro-glycerine for..... 64
Bleaching,—Hypochloride of Magnesia for..... 373
Boiler Explosions and their Prevention..... 145, 226
Boller, (A. P.) Method of Framing Double Battered Posts..... 130
Bolts and Nuts,—Notice of working Drawings of the Standard for..... 368
————,—On the Manufacture of..... 115
——-,—Effect of Sudden Strains on..... 364
Boring of large Cylinders as conducted at the Novelty Works,—Notice of the 152
Break for the entire Train under the Control of the Driver,—Description of a Car..... 294
Breech Loaders,—Notice of American..... 368
Bridge across the Schuylkill at Girard Avenue,—Notice of the Railway..... 83
———,—Notice of the new Louisville..... 368
——— on the Philadelphia, Wilmington and Baltimore Railroad,—Description of the Susquehanna..... 6, 239
——— over the Niagara River at Buffalo,—Notice of the..... 83

Cable,—Description of the Florida and Cuba Electric..... 252
Canal at Chicago,—Notice of the Improvement on the Michigan and Illinois 295
Candles,—Notice of Adolph Ott's Work on the Art of Manufacturing Soaps and 425
Car Break for the entire Train,—Description of a..... 294
Carbon in Steel,--Test for the Amount of..... 230
Cards,—Notice of J. T. Shinn's Crystallized..... 88
Central Park,—Description of the New York..... 11, 100, 153, 233, 297, 391
Chemical Toy,—Description of a new..... 229
Chicago Lake Tunnel,—Editors' Remarks on the..... 148
——— River,—Notice of the Improvements at Chicago by tunneling the 295

Chinese Straws,—Method of Making 87
Coal as a Fuel,—Statistics of the Increase in the Use of Anthracite 314
Coffer Dam at Turner's Falls on the Connecticut River,—Description of the... 317
Colored Fires,—Notice of C. Bullock's Experiment to Prevent the Spontaneous Ignition of 87
Condensers,—Compressed Wood Packing for Surface 150
———,—Editor's Remarks on Surface 363
Cranes,—Direct-acting 363
Cultivation by Steam in England,—Notice of 61
Cylinders as conducted at the Novelty Works,—Notice of the Boring of large 152

Desulphurizing Gold and Silver Ores,—Reviews of Recent Alterations in 25
Diagrams,—Description of a Plan for Making cheap Lecture 370
Disinfectants and Deodorizers,—Burnett's Fluids ordered to be Discontinued 86
Dismal Swamp Canal,—Notice of the 367
Distilling Sea-water,—On 41
Dredging in the River Tyne,—Notice of Improvements by 62
Drill Rest for Grinding,—Description of Strahan's 5

Editorial Notices
1, 5, 6, 38, 47, 74, 81, 88, 145, 150, 217, 255, 289, 305, 344, 349, 361, 423
Electric Discharges in Rarified Gas,—Notice of the Character of 67
——— Instruments of Registration,—Notice of 374
——— Light,—Editor on the 289
——— Lights employed to Illuminate the Bois de Boulogne 231
——— ——— in the Shops of the North Spanish Railway 232
——— Machine,—Notice of Wild's Magneto- 231
———,—Holtz 36, 119, 121, 253, 255, 344
Electricity and Light,—Prof. Henry Morton's Lectures on 48, 200, 280, 358, 413
Embankments to be Constructed on the Loire, &c.,—Notice of Massive 84
Engines,—F. J. Slade on Counterbalancing Reciprocating 337
Erie Canal,—Notice of the Enlargement of the 367
Evaporation of Steam-boilers used for Heating Purposes,—Experiments on the 272
Explosions and their Prevention,—Notice of Boiler 145, 226
Extract of Meat,—Notice of some remarkable Facts Relating to 373
Eyes in Machinery,—On Pins and 107

Factories,—Formulas and Tables for the Shafting of Mills and 379
Filtering Water by Magnetic Oxide of Iron 38
Filtration,—Notice of M. C. Lea's Process of Inverse 68
Flames,—Prof. Tyndall on Sounding and Sensitive 260, 346
Florida and Cuba Submarine Cable,—Description of the 252
Framing Double Battered Posts,—The Method of 130
Francis, (J. B.) Description of the Coffer Dam at Turner's Falls 317
——— Experiments on the Evaporation of Steam-boilers used for Heating Purposes 272
——— Formulas and Tables for the Shafting of Mills and Factories 379
Frigate *New Ironsides*,—Description of the U. S. Steam-armored 73
Furnaces,—Description of a Hoist for Iron 227
Franklin Institute.
Proceedings of Stated Meetings 59, 140, 206, 284, 415
Fletcher, (Thomas,)—Notice of the Decease of 59
Bache, (Prof. A. D.,)—Notice of the Decease of 209
Standing Committees,—Appointment of the 208
Committee on Science and the Arts.
Report on J. Harrison, Jr.'s, Steam-boiler 131
——— D. Shive's Centrifugal Governor 421

Gas,—Methods of Storing 282, 354
——,—Notice of the Character of Electric Discharges in Rarified 67
——,—On the Preparation of Oxygen 56, 229, 371
——,——— Hydrogen 204
—— Engine,—Description of Hugon's 264
———,—Notice of a Lenoir 150

Gas Regulator,—Description of Leffingwell's 66
—— Reservoir,—Description of Robert Grant's 355
Gases by Colloid Septa,—On the Absorption and Dialytic Separation of 39
Gauge Cock Whistle,—Description of T. Shaw's 295
Gauges,—Method of Preventing the Fouling of Mercury 152
Glycerine on a Large Scale,—Notice of the Crystallization of 231
Gold and Silver Ores,—Review of Recent Alterations in Desulphurizing 25
Governor,—Report on D. Shive's Centrifugal 421
Grant, (W. H.) Description of the New York Central Park 11, 100, 153, 233, 297, 391
Grinding,—Strahan's Drill Rest for 5
Ground Batteries,—A. G. Ballantyne's Paper on 329
Gun cast at the Fort Pitt Foundry,—Notice of a Twenty-inch 366
Gunpowder,—Description of Neumeyer's Process for Non-explosive 85

Hammer,—Description of T. Shaw's Dead Stroke Power 228
Harbors through their Delta,—Howard on the Improvement in Rivers and ... 249
Harlam Lake,—Description of the Pumping Engines of the 364
Harrison, Jr., (Joseph.) On the Steam-boiler 89, 161
Heating and Ventilating the Philadelphia Almshouse,—Report of the Committee on 14
Hick's Engine,—Notice of the 151
Holtz Machine,—A Simple, Cheap and Efficient Form, by H. Morton, of the 119
————————,—A new Form of the 36
————————,—A further Modification, by M. A. Piche, of the 121
————————,—Proposed Changes in the 255
————————,—Chester's Improved Form of the 253
————————,—Ritchie's Modification of the 344
Hoosac Tunnel,—Notice of the 224
Howard, (D. S.) On the Improvement of Rivers and Harbors through their Delta 249
Hydraulic Ram,—Observations for Useful Effect. By Gen. H. Haupt 118
———— Whipping Hoist 363
Hydrogen,—On the Preparation of 204
Hypochloride of Magnesia for Bleaching 373

Ice Machine on Carré's Plan,—Notice of an 67
———— by M. Toselli,—Notice of an 231
Ignition of Colored Fires,—Notice of C. Bullock's Experiments to Prevent Spontaneous 87
Indium at the Paris Exhibition,—Notice of Ingots of 374
Induction Coil,—H. Morton on an Important Adjunct to the 256
Ink,—Editor's Remarks on How to Select Indian 149
Insulator,—Report on Brookes' Telegraphic 375
Inverted Image in the Magic Lantern,—H. Morton on Erecting the 406
Iron, and its Conversion into Iron and Steel by the Pneumatic Process,—On the Treatment of Melted Cast 32
Iron and Steel,—Notice of the Bessemer Process for Making 232
—— Furnaces,—Description of a Hoist for 227
—— Permanent Way in use on the German Railways,—Description of the 306
—— Trade,—Statement of the English 224
—— Works,—On the Machinery of 263

Jam Nuts and their Office,—Editor's Remarks on 149
Japanese Matches,—Process for Making 87
Journal Bearings. Discussion before the Franklin Institute 416
————————,—Paper by C. Sellers on 29
————————,—Paper by C. Sellers on Ball and Socket 118

Lecture Diagrams,—Description of a Plan for making Cheap 370
Leeds, (L. W.) Lectures on Ventilation 185, 265, 321, 398
Lenoir Gas Engine,—Notice of a 160
Lens,—Description of Zentmayer's 349
Light,—Prof. H. Morton's Lectures on Electricity and 48, 200, 280, 356, 413
Lightning Rod improperly Constructed,—Notice of a 374

Lithography,—Editor's Remarks on Photo- 147
Locomotive,—Notice of Schinid's Road 151
———— Engine on the Camden and Amboy Road,—Notice of a Large... 367
Louisville Bridge,—Notice of the new 368
Lubricating Oils,—How to Select 120

Machinery of Iron Works,—On the 263
Magic Lantern as a Means of Demonstration 55, 204, 282, 354, 409
————,—H. Morton on Erecting the Inverted Image in the 406
Magneto-electric Machine,—Notice of Wild's 231
Marble Fronts of Buildings,—Notice of a Process for Cleaning 367
Matches,—Process for Making Japanese 87
Meat,—Notice of some Remarkable Facts Relating to Extracts of 373
——,—Process for the Preservation of ..... ib.
Mechanical Improvements,—Notice of 368
Meerschaum,—Process for Making Artificial 373
Mercury Gauges,—Mode of Preventing the Fouling of 152
Meteorology of Philadelphia 71, 143, 216, 287, 360, 426
Mills and Factories,—Formulas and Tables for the Shafting of 379
Mill Stones,—Process for the Ventilation of 85
Mineralogy,—Theo. D. Rand's Lecture on 403
Missouri Bridge,—Notice of the 366
Models of Locomotives, &c.,—Notice of Queen & Co.'s Working 66
Muchet, (R.) On the Treatment of Melted Cast Iron and its Conversion into Iron and Steel by the Pneumatic Process 32

New Ironsides,—Description of the U. S. Steam Armored Frigate 73
New York Central Park,—Description of the 11, 100, 153, 233, 297, 391
———— Correspondence 376
Nitro-glycerine for Blasting,—Notice of 64
————,—Notice of Mr. Kopp's Experiments with 84
Nuts,—On the Manufacture of Bolts and 45
——,—Notice of Working Drawings of the Standard for Bolts and 368

Oil Presses,—Description of J. Shinn's Improvements in 229
Ores,—Review of Recent Alterations made in Desulphurizing Gold and Silver 25
Oxygen,—New Method for the Preparation of 371
————,—On the Supposed Nature of Air prior to the Discovery of 193
———— Gas,—On the Preparation of 56, 229

Pacific Railway,—Notice of the 365
Paper which turns Pale Ink Black,—Notice of J. E. Hover's 88
Parhelium observed at Germantown,—Description of a 277
Paris Exhibition,—Notice of the 81
Park,—Description of the New York Central 11, 100, 153, 233, 297, 391
Parker, (G. A.) Description of the Susquehanna Bridge on the Philadelphia, Wilmington and Baltimore Railroad 6, 239
Pennsylvania Railroad,—Facts and Figures in Regard to the 350
———— Steel Co.'s Works at Baldwin,—Notice of the 296
Perfumery,—Notice of G. W. S. Piesse's Work on the Art of 423
Permanent Ways,—Editor's Remarks on 305
———— in Use on German Railroads,—Description of the Iron 306
Petroleum Fuel,—Notice of C. J. Richardson's Improvement in 84
Philosophical Toys,—Notice of Queen & Co.'s 87
Photographic Cutter,—Description of Bergner's 64
———— Mosaics. M. C. Lea and E. L. Wilson,—Notice of 70
Photographs by Artificial Light,—Notice of T. Skaife's Plan for instantaneous 86
Photographs,—Description of a Process for Producing Multiple 370
Photo-lithography, Editor's Remarks on Practical 147
————Sculpture,—Description of the Theory of the Operation of 232
Piles,—W. J. McAlpine's Formula for Ascertaining the Supporting Power of 181
Pine Tree,—Notice of the Useful Products of the 231
Pins and Eyes in Machinery.—On 107

Plaster of Paris mixed with Alum forms a Cement for the Laboratory..... 373
Platinum in Grove's Battery,—Silver may be Substituted for..... 86
Pneumatic Dispatch,—Editor's Remarks on the..... 217
Polytechnic Schools in the United States,—Notice of S. E. Warren's Notes on the..... 210
Post,—Method of Framing a Double Battered..... 130
Power with Economy,—Editor on Transmitting..... 361
Pump of Appold's Pattern,—Notice of a Centrifugal..... 63
Pumps,—Notice of R. Cornelius' Improvement in..... 152
Pumping by Water Power..... 406
——— Engines of the Harlam Lake,—Description of the..... 364

Rail Question,—On the Steel..... 178
Rails,—On Steel..... 22
——,—S. L. Potter's Process for Making Steel Headed..... 151
Railroad,—Editor's Remarks on the Union Pacific..... 148
———,—Facts and Figures Relating to the Pennsylvania..... 350
———,—Notice of the Interoceanic..... 365
Railway across the English Channel,—Notice of a..... 224
——— and Road Bridge over the Po at Mezzana Corti..... 223
——— across the Schuylkill at Girard Avenue,—Notice of the..... 83
———,—Description of the Metropolitan District..... 16
——— from Vera Cruz to Mexico,—Notice of a..... 83
———,—Notice of the London and North Western..... 224
———,——— Paris Belt..... 223
———,——— Pacific..... 365
Railways,—Description of the Iron Permanent Ways used on German..... 306
——— in India,—Notice of..... 82
———,—Notice of the French..... 366
———,—W. W. Evans on Chilled Wheels for..... 183
Rand, (Theo. D.) Lecture on Mineralogy..... 403
Reciprocating Engines,—F. J. Slade on Counterbalancing..... 337
Reservoir,—Account of an Immense..... 222
Rivers and Harbors through their Delta,—Howard on the Improvement of... 249
Road Traction Engines,—On..... 117

Salt,—Notice of an Immense Deposit of Pure Rock..... 68
—— Springs in Kansas,—Notice of Large..... 368
Scientific Toy,—Notice of the Last..... 38
Screw Steamers,—How to Take away the Shake in..... 328
Sellers, (Coleman.) Remarks on Journal Bearings..... 29, 198
Shades and Shadows,—Notice of S. E. Warren's General Problem of..... 359
Shaftings of Mills and Factories,—Formulas and Tables for the..... 379
Sheafer, (P. W.) Statistics of the Increase in the Use of Anthracite Coal as a Fuel..... 314
Ships Timbers,—Notice of Speakman's Apparatus for Preserving..... 66
Silver may be Substituted for Platinum in Grove's Battery..... 86
——— Ores,—Review of Recent Alterations in Desulphurizing Gold and..... 25
Slade, (F. J.) On Counterbalancing Reciprocating Engines..... 337
Sodium Amalgam when used for the Extraction of Silver,—Notice of..... 231
Soaps and Candles,—Notice of A. Ott's Work on the Art of Manufacturing... 425
Sounding and Sensitive Flames,—Prof. Tyndall on..... 260, 346
Spectroscopes,—Notice of the Prices of..... 232
Spectrum Analysis as applied to the Heavenly Bodies,—Notice of a Work on 231
——————— of Stars by Father Secchi,—Notice of..... 66
Springs,—Description of Black's Combined Elliptic and Corrugated..... 46
Steam Armored Frigate *New Ironsides*,—Description of the U. S..... 73
——— Boiler Explosions and their Prevention..... 145, 226
Steam Boiler Invented by Jos. Harrison, Jr. Report on the..... 131
——— Boilers,—Jos. Harrison, Jr.'s paper on..... 88, 161
———————,—On Overheated..... 111
——————— used for Heating Purposes,—Experiments on the Evaporation of 272
Steam Cultivation in England,—Notice of..... 61

Steamship by Centrifugal Pumps,—Notice of a Success in Raising a Sunken. 84
Steel Boilers,—Editor's Notice of..... 364
—— Co.'s Works at Baldwin,—Notice of the Pennsylvania..... 295
—— Faced Armor Plates,—Notice of..... 224
—— Headed Rails,—S. L. Potter's Process for Making..... 151
——,—Notice of the Bessemer Process for Making Iron and..... 232
——,—On the Treatment of Melted Cast Iron and its Conversion by the Pneumatic Process into Iron and..... 32
—— Proposed Improvement in the Manufacture of..... 230
—— Rail Question,—On the..... 178
—— Rails,—On..... 22
——,—Test for the Amount of Carbon in..... 230
—— Wire,—On the Uses of..... 397
Strains on Bolts,—The Effect of Sudden..... 364
Straws,—Method of Making Chinese Straws..... 87
Submarine Cables,—Description of the Florida and Cuba..... 252
Suez Canal and its Constructive Machinery,—Notice of Models of the..... 365
Sulphate of Barium as a Substitute for White Lead,—Notice of..... 68
Surface Condensers,—Compressed Wood Packing for..... 150
——,—Editor on..... 363
Surveying Instruments,—Description of an Improvement in..... 294
Susquehanna Bridge on the Philadelphia, Wilmington and Baltimore Railroad,—Description of the..... 6, 239

Tannin,—W. Skey's Process for Preparing Artificial..... 86
Telegraphic Insulator,—Report on Brookes'..... 375
Telegraphy,—Cantor Lectures on Submarine..... 42, 122
Telescopes of Glass Silvered by Liebig's Process,—Notice of Reflecting..... 370
Traction Engines,—On Road..... 117
Tunnel,—Notice of the Hoosac..... 224
—— to Supply Chicago with Water,—Notice of the Lake..... 63
—— through the Sierra Nevada..... 84
—— under the Chicago River,—Notice of the..... 295
—— English Channel,—Notice of the..... 84
Tyres of Locomotives, &c.,—On Grinding the..... 114

Union Pacific Railroad,—Editor's Remarks on the..... 148

Valves,—Description of T. Shaw's Improvement in..... 295
Vegetable Fibre Converted into a Substance resembling Inulin..... 231
—— Growth,—Notice of Wonderful Illustration of..... 369
Ventilation of the Philadelphia Almshouse,—Experiments in the..... 60
——,—Report of the Committee on Heating and..... 14
——,—L. W. Leeds' Lectures on..... 185, 265, 321, 398
Vibration of Strings.—Experiments Illustrating the..... 230

Warming and Ventilating the Philadelphia Almshouse,—Experiments on..... 60
Water,—A Test for Organic Matter in..... 374
—— by Magnetic Oxide of Iron.—On Filtering..... 38
—— in a Ship's Hold,—Description of Speakman's Apparatus for Measuring the..... 62
——,—Notice of the Lake Tunnel to Supply Chicago with..... 63
——,—On Distilling Sea..... 41
—— Power,—Pumping by..... 408
—— Works for London,—Description of the Southwark and Vauxhall..... 66
Wheels for Railways,—W. W. Evans on Chilled..... 182
Whistle,—Description of T. Shaw's Gauge Cock..... 293
While Lead,—Notice of Sulphate of Barium as a Substitute for..... 65
Wilson, (J. M.) Facts and Figures in Regard to the Pennsylvania Railroad 350
Wire Making by a Continuous Process of Rolling..... 151
——,—On the Use of Steel..... 397
Wood Packing for Surface Condensers,—Compressed..... 150

Zentmayer Lens,—Experiments with the..... 439
